## Early earthworks

October – November 2019

# Elizabeth Drive and Badgerys Creek Road, Badgerys Creek

Dear neighbour,

Early earthworks for Western Sydney International are continuing with the construction of a new, realigned section of Badgerys Creek Road between Elizabeth Drive and Longleys Road as well as completion of cut and fill works, totaling around 1.8 million cubic metres of earth. This work includes:

- construction of a new roundabout and civil works on Elizabeth Drive
- bulk earthworks
- asphaltting and installation of concrete pavements
- new stormwater drainage installation
- basin construction including erosion control measures
- adjustment and connection of utilities
- connection of new communication infrastructure

### Elizabeth Drive work

Work will continue along Elizabeth Drive between Badgerys Creek Road and Lawson Road behind the concrete construction barriers. Works include earthworks, pavement construction, trenching and installation of stormwater drainage.

### Night work on Badgerys Creek Road realignment

Installation of concrete pavements for the new alignment of Badgerys Creek Road has commenced. Concrete pours will be completed during the day and saw cutting to create joints in the pavement will be carried out between 6pm and 12am on Monday to Friday. This work is required

at night to enable the concrete pavement to be a certain hardness before cuts can be made. The work is not expected to be noisy and will be completed by Tuesday 1 November, weather permitting.

### Night work for communications services

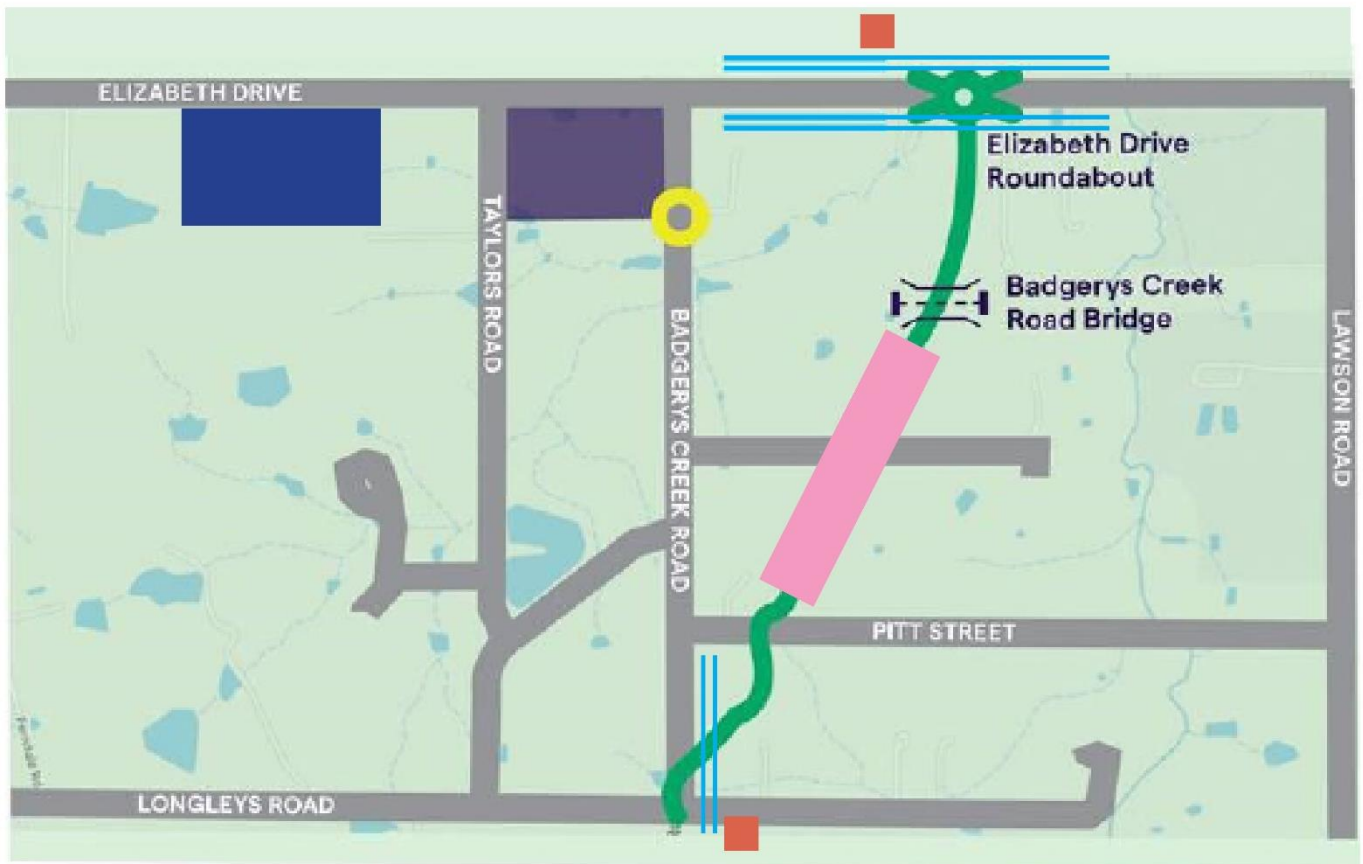

Works will be carried out by Telstra from 6pm on Monday 28 October to 5am on Tuesday 29 October, weather permitting, to connect new communications infrastructure. This work is not expected to be noisy and will be carried out near the intersection of Longleys Road and Badgerys Creek Road, as well as behind the concrete barriers on the northern side of Elizabeth Drive.

Early earthworks are being carried out by the CPB Contractors and Lendlease Joint Venture (CPBLL JV) and are expected to be completed in 2020.

We are continuing to work closely with our neighbours as we deliver Early earthworks for Western Sydney International and will continue to update you as work progresses.
